Re: Exposition Green Corridor Proposal

Dear Mr. Weiss,

We received and reviewed your Exposition Green Corridor conceptual plan submitted to our office on May 23, 2007. Heal the Bay is extremely supportive of greening projects that maximize storm water infiltration and treatment. This type of best management practice (“BMP”) can result in major water quality benefits. The Exposition Right of Way appears to be an ideal location to explore this type of storm water BMP further.

Heal the Bay would be more than happy to work with stakeholders and MTA in exploring these concepts further.

Sincerely,

Kirsten James
Staff Scientist
